

Locate the Study Record via Study Maintenance

There are several ways to search for study records using different identifiers. This tip sheet uses PRO 13657 as the example. Study Code field is 13657, Study Name field is Sunitinib/Gemcitabine or Sunitinib in Advanced Renal Cell Carcinoma with Sarcomatoid Features, NCT field is 01164228, and the IRB approval # field is PRO00013657.

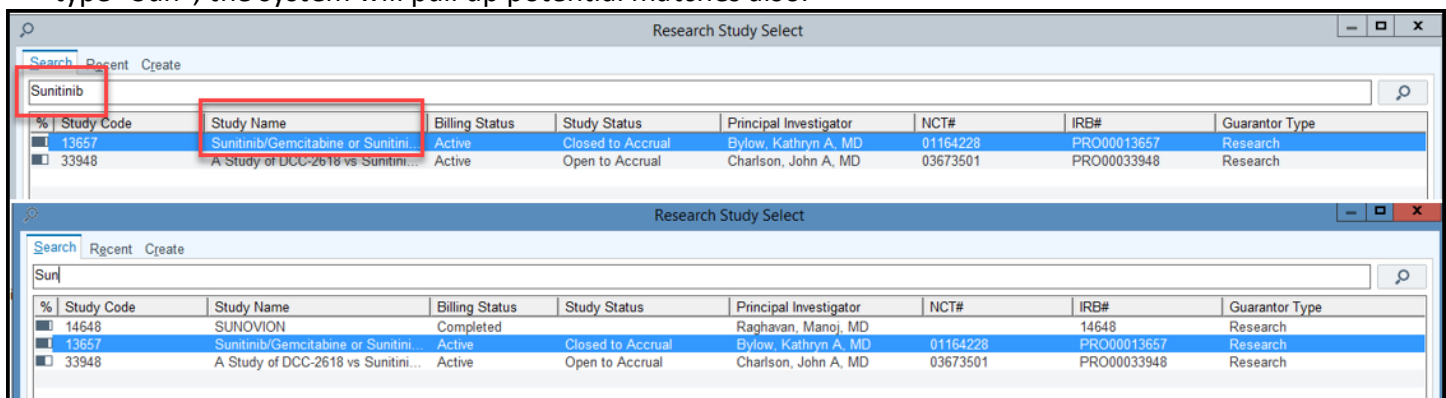

Try It Out

1. Search for the **Study Code** field by typing it as my search term. You need to type the entire Study Code to get a result. For example, typing 136 won't pull up 13657

Study Code	Study Name	Billing Status	Study Status	Principal Investigator	NCT#	IRB#	Guarantor Type
13657	Sunitinib/Gemcitabine or Sunitini...	Active	Closed to Accrual	Bylow, Kathryn A, MD	01164228	PRO00013657	Research

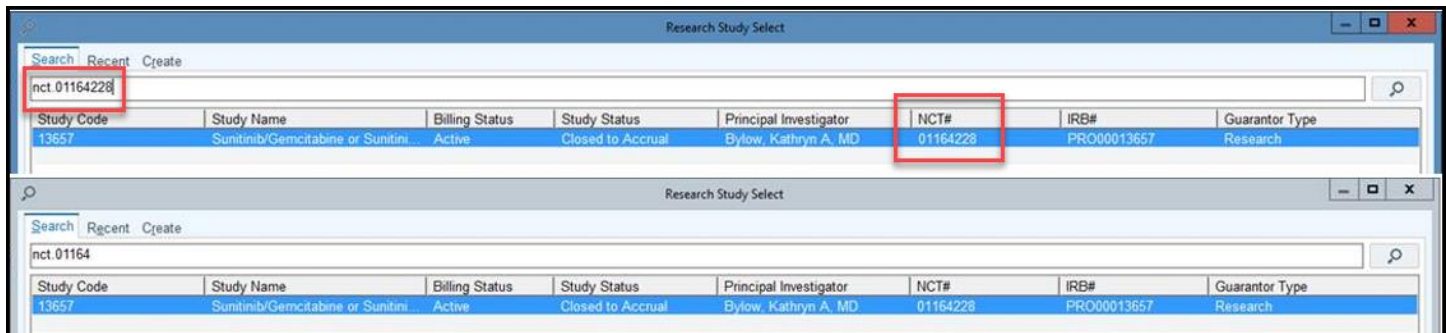

2. Search for the **Study Name** by typing word(s) from the study name the search field, for this example, one of the study drug names "Sunitinib". The system will perform completion matching so if you only type "Sun", the system will pull up potential matches also.
